Tirupati, Andhra Pradesh

Objective

Aspiring Software Developer with a strong foundation in Java Full Stack Development, eager to apply my skills in designing, developing, and maintaining software solutions. Passionate about learning new technologies and contributing to innovative projects that create real-world impact.

Education

Sri Venkateswara college of Engineering || 2021 - 2025

Bachelor of Technologies -Computer Science - 8.4 CGPA

Sri Chaitanya junior College || 2019-2021

Physics , Mathematics, and Chemistry - 91%

Professional Skill

Programming Languages : Java , Python

- Hands on Knowledge Object Oriented Program, Collections, Exception Handling, Strings, Arrays, Threads.

Databases : SQL

- Strong Knowledge on DDL, DML, DCL, TCL statements, ACID properties, Joins and Subqueries.

Web Languages : HTML5, CSS, Java Script, Bootstrap

Web Technologies : JSON , XML , Rest API

Frameworks : Spring Boot, React JS

Cloud Platforms:

- AWS (EC2, S3, IAM basics)
- Docker, Kubernetes (basic)

Tools : Maven, Postman, Eclipse, MySQL

Project

Ticket Booking Application :

The Ticket Booking Application is a web-based platform developed using **Spring Boot** that enables users to seamlessly search, book, and manage tickets for events, movies, or travel. The system allows users to create accounts, browse available shows or trips, book seats in real-time, and receive booking confirmations via email. The backend is powered by **Spring Boot** with **RESTful APIs**, integrated with **MySQL** for database management. The application ensures secure transactions, handles concurrency during seat booking, and provides an admin panel to manage events, schedules, and ticket pricing.

Student Management System :

The Student Management System is a web-based application designed to efficiently manage and organize student information within an educational institution. It allows administrators and staff to add, update, view, and delete student records, including personal details, course enrollment. Developed using Java, JDBC, and MySQL for backend operations, and HTML, CSS, and JavaScript for frontend interface, the system ensures secure data storage, easy retrieval, and real-time updates. It helps streamline administrative tasks, improve data accuracy, and enhance communication between staff and students.

Internship

Full Stack Developer Intern

Rooman Technologies — *(February 2025 – May 2025)*

Completed an intensive Full Stack Development internship at Rooman Technologies, gaining hands-on experience in building web applications using **Java**, **Spring Boot**, **HTML**, **CSS**, **JavaScript**, and **MySQL**.

Worked on both frontend and backend development, developed RESTful APIs, and integrated database operations using Spring Data JPA. Collaborated in Agile teams to deliver end-to-end features and participated in code reviews, testing, and deployment.

Certification

- Java Full Stack Inter - Rooman Technologies
- DevOps - EdX

Strength

- Strong Teamwork and Collaboration Abilities
- Effective Verbal and Written Communication
- High Adaptability and Learning Agility
- Problem-Solving and Analytical Thinking
- Excellent Time Management and Organization
